PROFESSIONAL SUMMARY

BICT undergraduate at the University of Vavuniya with hands-on experience building web, data-analysis and computer-vision projects across Python, Java, C, C++ and C#. Comfortable picking up new tools independently, drawn to solving real, everyday problems with practical, lightweight technology, and looking for an internship or entry-level developer role to grow as a software engineer.

EDUCATION

Bachelor of Information and Communication Technology (BICT)

University of Vavuniya — Faculty of Technological Studies, Dept. of ICT

Relevant coursework: Programming (Java, Python, C/C++, C#), Data Structures & Algorithms, Database Systems, Web Technologies, System Analysis & Design, Data Science Fundamentals.

CERTIFICATIONS & ADDITIONAL QUALIFICATIONS

- Diploma in Information Technology — 2024
- Diploma in Fluent English — 2024
- Python for Beginners — 2025

TECHNICAL SKILLS

Languages	Java, Python, C, C++, C#
Web	HTML5, CSS3, JavaScript
Data / Tools	Pandas, Matplotlib, Seaborn, Jupyter Notebook, Google Sheets (as data store)
Other	Git & GitHub, MediaPipe, WebRTC, VS Code

Soft skills: self-directed learning, problem-solving, adaptability, teamwork, clear communication.

PROJECTS

Calculator

A simple and user-friendly web-based calculator developed using HTML, CSS, and JavaScript. Supports addition, subtraction, multiplication, and division. Strengthened skills in web development, JavaScript logic, UI design, and problem solving.

Food Delivery System

A Java-based application to manage food ordering and delivery, covering customers, food items, menus, orders, and delivery information. Built using Object-Oriented Programming and database concepts to organize and process orders efficiently.

Pharmacy Management System

Software to manage the daily operations of a pharmacy, including medicines, sales, purchases, inventory, suppliers, customers, and prescriptions.

EXPERIENCE & ACTIVITIES

- Library Management System – Developed an academic project using C#.
- Online Food Booking App – Designed the application interface using Figma.
- Food Delivery System – Developed a Java-based application using Java, MySQL, and OOP.
- Devssprint – Contributed as a Logistics Team member.
- GitHub Dev Day – Contributed as a Logistics Team member.

- Career Compass – Participated as a Volunteer.
- Empowering Women Entrepreneurship – Participated in a professional workshop.

CAREER OBJECTIVE

To build a successful career in the ICT industry by applying my knowledge of software development, web development, databases, and system design to real-world projects while continuously learning new technologies and improving my technical and problem-solving skills.
